Memory dialing

This telephone can store up to 13 different phone numbers, each up to 21 digits long. Remaining numbers will be stored in memory unless you erase or change them by entering other numbers. Note: Numbers programmed in a memory location cannot be erased or replaced if the telephone has been unplugged from the line for a full day or more.

Directory card: Remove the directory card. Write your telephone number in the space provided. Also write the telephone numbers (or names) that you want to store in memory location. Reinsert the card and clear plastic cover.

Memory dialing

One-touch dialing

Three numbers can be stored in one-touch dialing locations. You can dial any of these numbers by pressing two buttons. To program numbers into memory:

1. Lift the handset.
2. Press [1], [2], or [3].
3. Enter a dial number (0-9) for the memory location where you want to store the number.
4. Dial the telephone number. You will hear a dial tone each time a digit is pressed.
5. Hang up after the number is entered correctly.

Repeat Steps 1-4 to store another number.

To dial:

1. Lift the handset.
2. Press [1], [2], or [3].

Speed dialing

Ten telephone numbers can be stored in standard speed-dialing locations. You can dial any of these numbers by pressing two buttons. To program numbers into memory:

1. Lift the handset.
2. Press [4], [5], or [6].
3. Enter a dial number (0-9) for the memory location where you want to store the number.
4. Enter the telephone number. You will hear a dial tone each time a digit is pressed.
5. Hang up after the number is entered correctly.

Repeat Steps 1-5 to store another number.

To dial:

1. Lift the dial tone.
2. Press [4], [5], or [6].
3. Press memory location (0-9).

Memory erase:

To erase an entry from memory, you can enter another number in the same location.

In case of difficulty

If you have difficulty operating this phone, try the suggestions below. For Customer Service, visit our website at www.telephones.att.com or call 1 (800) 222-3111. In Canada, call 1 (866) 288-4288.

Problem Solution

Problem telephone may be caused by local telephone central office equipment, or a wrong line. Have the service company check the line. If the problem persists, call Customer Service.

In case of difficulty

Problem Calls cannot be dialed, or are dialed slowly

Solution This product comes in the Tec (TT) mode. Make sure you choose the correct dialing mode (TT or DP) in the System Setup menu (see page 6). Touch tone dialing will not work if you have dial pulses.

In case of difficulty

Problem You can hear the other party, but can't hear the telephone

Solution The trouble may be caused by local telephone central office equipment, or an incorrect line. Have the service company check the line. If the problem persists, call Customer Service.

In case of difficulty

Problem Telephone does not ring

Solution Make sure the ringer selector switch is not set to OFF. If you have disconnected the telephone, then clear the line. Also, if there are several other phones on the same line, try disconnecting some of the other phones.

In case of difficulty

Problem Telephone works for one line only, or an incoming call does not ring

Solution The telephone may be installed incorrectly. Please see the instructions for installing your new telephone. Be sure the telephone is plugged into the correct line before using it.
